

## *Conférence plénière*

### **Vers Une Plateforme Méditerranéenne des Connaissances sur l'Eau**

#### *JAUAD EL KHARRAZ*

---

**Dr. Jauad El Kharraz**, has been Information Manager of the EMWIS Technical Unit since early 2004. He has a PhD in Remote Sensing Sciences from the University of Valencia, (Spain, 2001-2003). He worked as senior consultant for Sud-Convergences (France) on 2006-2008. He is the author of more than 50 well cited publications and communications on international reviews and at symposiums in remote sensing and water sectors. In addition, he is Expert Evaluator of the European Commission DG Research & Innovation, and since October 2013 he was nominated COST (European Co-operation in the field of Scientific and Technical Research).

**Dr. Jauad** participated in numerous projects funded by the European Commission, European Space Agency, and other institutions, among others: MED-3R on adapted waste management in the Mediterranean, WATERMED on water use efficiency using remote sensing data, RWKN on Regional Knowledge Network on Systemic Approaches to Water Resources Management, Regional project on Strengthening National Water Information Systems and Harmonization of Data Collection towards a Shared Water Information System, GLObal RIVER Water & Earth observation, etc.

On the other hand, he is co-founder and General Secretary of the Arab World Association of Young Scientists (ArabWAYS), member of the Global Change Unit (University of Valencia, Spain). He is member of the Global Young Academy (GYA). Dr. Jauad El Kharraz was one of 40 scientists worldwide selected to attend the “World Economic Forum 'Summer Davos' for New Champions” in Tianjin China in September 2012. He is also member of the International Journal of Agriculture and Food Research (IJAFR) Editorial Review Board.
